

HAPPY MOTHER'S DAY

This Mother's Day we honor all of the amazing mothers whose love, patience, and wisdom help to nourish and grow their children. Moms are full of great advice, so we decided to ask our team members for some of the best advice they've received throughout the years from their mothers—Here's what they said!

MEMORIAL DAY REMEMBRANCE

This Memorial Day, KEP remembers with gratitude and pride all those who served and sacrificed for our country and our freedom. We are also proud to have many hardworking veterans on our team. May this Memorial Day be filled with good memories and peace.

LESSONS IN LEADERSHIP

Download our latest white paper! “Total Cost of Ownership – Unite Cross-Functional Teams,” Part 3 of our 4-part series “Strategies for Successful Procurement Partnerships,” is available now. In this white paper, Joe Williamson, Sr. Director, Global Sales & Customer Operations at KEP, discusses assessing balance cost and quality, learning from industry best practices, high impact criteria for Total Cost of Ownership and more.

[Download Part 3 here](#), then watch for Part 4, “Total Cost of Ownership – Determine the Products True Cost,” which will be out next!

TEAM MEMBER SPOTLIGHT

Tina Long has been a team member for over 10 years and is a hardworking Extrusion Operator at our Mogadore location, where KEP manufactures extruded tubing and profiles and has assembly operations. Tina started working at KEP in 2006 and is passionate about being a dedicated team member. Learn more about Tina Long in our [Leader Views Blog!](#)

PRODUCT FEATURE

In-Demand Laboratory Supply Products

What do scientists, lab technicians, nurses, convenience, and KEP have in common?

Our high-quality laboratory supply products, of course!

KEP laboratory supply products are in demand because they help industry professionals keep their focus on their own important jobs while KEP conveniently ensures regulatory standards are met, allergies are avoided, and quality exceeds requirements.

The increased need for better quality of testing during research in the laboratory has led to the [demand for lab supplies](#) that adhere to regulatory standards. Not only do KEP products, like our latex tubing, strictly follow regulatory standards, they also boast precise quality and easy sterilization which is necessary in lab environments. Plus, with virtually undetectable protein levels (99.9% protein-free) in our latex tubing, there also is a reduction in allergen reactions, thanks to extensive leaching, washing and surface-treating.

KEP produces tubing for almost any job in the lab including chromatography and pump connection hose tubing. These are available in private label rolls and in more than 200 size combinations!

It doesn't stop at latex tubing products — KEP also manufactures in-demand [non-latex Free-Band® tourniquets](#) for laboratory blood draws and boluses.

These products are safe for individuals with latex sensitivities and are available in convenient packaging with custom quantities available, designed to provide ease-of-use and convenience for every application.

From scientific discovery and food quality control to saving lives in hospitals, KEP is there facilitating convenience and safety while helping our customers in each industry put their name behind quality products.
